By Sandra L. Wick

K-State Research and Extension-Post Rock Extension District  
Crop Production Agent

## Post Rock Extension District “Recorded” Wheat Plot Tour

Well, it won't be long, and the combines and farm trucks will be rolling in the wheat fields around north central KS. The 2022 wheat crop has certainly been through a variety of conditions during the growing season. Stay tuned and I will provide an update on our Post Rock Extension District Wheat Demonstration Plot Tours that were held the end of May.

Annually, the Post Rock Extension District conducts face-to-face tours of our wheat demonstration plots around the district, and this was held on Thursday, May 26 at our four locations. The variety signs are up on each of the wheat plots in Jewell, Mitchell, Osborne and Smith counties and the field locations are posted on our website at [www.postrock.ksu.edu](http://www.postrock.ksu.edu) under the “Crops” tab and then go to “Test Plots”. So, we encourage you to go by and take a look at the varieties in any of the wheat plots closest to you.

Thanks to our Post Rock Extension District Communications Manager, Shannon Rogers, we recorded the Smith County wheat demonstration plot tour, and it is posted on our “Crops” page, under “Test Plots.” K-State Research and Extension agronomists along with myself provided information on each of the varieties along with conditions throughout the growing season including diseases, insects or low temperature effects.

“The wheat variety plots provide a visual demonstration of how crop varieties perform in a particular area of the state along with yield potential of that variety,” Wick explains. “This is known as “seeing is believing!” “Producers who observe the demonstrations and the latest methods or practices, then may apply them to their own situations,” added Wick. Producers can then compare the yield data from the many K-State Research and Extension experiment fields across the state of Kansas, to this local yield data, in selecting the most adaptive and productive wheat varieties.

We encourage all producers and agriculture businesses to take advantage of these educational opportunities from the Post Rock Extension District and K-State Research and Extension.

For more information on our **Wheat Demonstration plot program**, contact me at any of our Post Rock Extension District Offices in Beloit, Lincoln, Mankato, Osborne or Smith Center.

-more-

*Post Rock Extension District of K-State Research and Extension serves Jewell, Lincoln, Mitchell, Osborne, and Smith counties. Sandra may be contacted at [swick@ksu.edu](mailto:swick@ksu.edu) or by calling Smith Center, 282-6823, Beloit 738-3597, Lincoln 524-4432, Mankato 378-3174, or Osborne 346-2521. Join us for our weekly “The Ag Roundup” by simply emailing me and getting on our weekly ag listserv. Also remember our website is [www.postrock.ksu.edu](http://www.postrock.ksu.edu) and my twitter account is @PRDcrops.*
